

I'd like to comment on the "Indiana Telephone Privacy Law". My familys quality of life has greatly improved with the passing of this law, instead of answering the phone all evening we are able to enjoy a QUITE night at home. Telephone solicitation is the real crime ,if there is a service that I or my family require I should be the one calling them not someone telling me what I need.If goods and service providers are counting on telephone marketing, maybe it is those companies that need to rethink there marketing stratagies. Repel or modification of this law would greatly reduce quaility of life in Indiana
